

Crown WP3035-45 Series

Electric Pallet Truck Lift Interrupt Circuit Connection for Onboard SkidWeigh Series Hydraulic Pressure Transducer Check Weighing Scales (ED2-EP, ED3-EP and SC5)

Disconnect wire 2907 on terminal on the LMS switch.

From digital indicator connect one of the black wire to the wire 2907 that came off the switch and the other black wire back to the terminal on the switch. Interface of two black wires to the LMS switch is made without any modifications to the Crown factory wiring.

Note: Same LMS switch interface with two black wires applies for SkidWeigh EP systems installed on for WP3200, WP2300 and WP3000 series.
